FHFA's Security Controls Were Not Effective to Protect Its Network and Systems Against Internal Threats

The Federal Housing Finance Agency (FHFA) Office of Inspector General (OIG) issued the subject report on September 29, 2026. As part of our ongoing oversight of the FHFA's compliance with the Federal Information Security Modernization Act (FISMA), we perform audits of networks and information security of the FHFA.

AUDIT OBJECTIVE: The objective of our audit was to determine whether FHFA's security controls were effective in protecting its network and information systems against internal threats. The audit scope covered FHFA's internal network and information systems from November 2025 through January 2026. This work will support the annual FISMA evaluation of the FHFA's security program and practices.

Because information in this report could be used to circumvent FHFA's internal controls, it has not been released publicly.
